

Steven Lee Meisler

Curriculum Vitae

Steven is a developmental neuroinformaticist studying white matter maturation and its role in cognitive development and emerging psychopathology. As a NICHD K99/R00 postdoctoral fellow at the University of Pennsylvania, he leverages large-scale datasets and advanced analytic methods to characterize white matter developmental trajectories across infancy, childhood, and adolescence. His graduate work integrated multimodal neuroimaging (fMRI, DWI) with psychocognitive assessments to investigate the neural bases of reading ability, disability, and intervention in children. Beyond his primary research, Steven is an active advocate for open and reproducible science. He moderates the NeuroStars.org support forum and teaches researchers how to process neuroimaging data using open-source, state-of-the-art tools. He received his bachelor's and master's degrees in bioengineering from the University of Pennsylvania (2017, 2018) and his PhD in Speech and Hearing Bioscience and Technology from Harvard University (2024).

Education

- 2019–2024
- PhD in Speech and Hearing Bioscience and Technology**, *Harvard University, Division of Medical Sciences*, Cambridge, MA
Secondary Field in Mind, Brain & Behavior
Dissertation: "White Matter Structural Correlates of Reading Abilities, Disabilities, and Intervention" - Advisor: John Gabrieli, PhD
- 2017–2018
- MSE in Bioengineering**, *University of Pennsylvania*, Philadelphia, PA, 3.79/4
Thesis: "Evaluating the Effect of Intracranial EEG Data Cleaning on Univariate and Multivariate Classifier Performance" - Advisor: Michael Kahana, PhD
- 2013–2017
- BSE in Bioengineering**, *University of Pennsylvania*, Philadelphia, PA, 3.70/4
magna cum laude
Minors in Mathematics, Jazz Studies, and Engineering Entrepreneurship

Research Positions

- 2024–
- Postdoctoral Fellow**, *Lifespan Informatics & Neuroimaging Center*, University of Pennsylvania (PI: Theodore Satterthwaite, MD), NIH **K99/R00** and T32 Fellow
 - Investigating white matter micro- and macrostructural trajectories in infants and toddlers, and how they are impacted by perinatal insult (e.g., low gestational age).
 - Gauging the generalizability of white matter growth curves derived from research-quality datasets to data acquired clinically.
 - Contributing to neuroimaging preprocessing software development (*QSIPrep*, *QSIRecon*, *XCP-D*).
- Summer 2024
- Research Scientist Intern**, *Turing Medical*, St. Louis, MO
 - Developed and tested neuroimaging software solutions for clinical practice.
- 2019–2024
- PhD Candidate**, *Gabrieli Lab*, MIT Brain and Cognitive Science (PI: John Gabrieli, PhD), NIH T32 Trainee and F31 Fellow
 - Used advanced diffusion-weighted imaging models to study white matter microstructural correlates of reading in large pediatric cohorts (> 1,000 participants).
 - Studied longitudinal microstructural changes in white matter associated with response to reading intervention.
 - Examined contributions of right hemispheric activity to reading improvement after intervention among dyslexic children.

Honors & Awards

2/2026-2/2028	Career Development Institute in Psychiatry Fellowship , University of Pittsburgh and Stanford University
9/2025-8/2026	Hartwell Fellowship , supporting early-stage biomedical research with potential to benefit children, Hartwell Foundation
9/2025-1/2026	ABCD-Repronim Teaching Fellow , ReproNim: A Center for Reproducible Neuroimaging Computation
6/2024-06/2025	Reproducible Neuroimaging Fellow , ReproNim-International Neuroinformatics Coordinating Facility (INCF)
5/2024	Ragnar & Margaret Naess Award for exceptional musical talent and commitment to performance, MIT
8/2022	Patrick J. McGovern Student Travel Award , MIT
Summer 2022	Selected for Neurohackademy 2022
3/2022	Certificate of Distinction in Teaching , Harvard University
3/2020	Mind Brain Behavior Graduate Student Award , Harvard University
3/2019	University Fellowship (<i>declined</i>), The Ohio State University
2017	magna cum laude , University of Pennsylvania
2015 – 2017	Dean’s List , University of Pennsylvania

Skills

Computing	Python, Bash / Terminal, R, GitHub, High-Performance Computing, $\LaTeX$, MATLAB
Methods	DWI, fMRI, EEG Time Series Analysis, BIDS-apps, Longitudinal/Non-linear Modeling
Other Skills	EPIC, REDCap, IRB, Jazz Vibraphone

Verified Peer Reviews

- *Nature Methods, Proceedings of the National Academy of Sciences, Journal of Neuroscience, Imaging Neuroscience, Biological Psychiatry, NeuroImage, Brain Structure & Function, npj Science of Learning, Neurobiology of Language, Brain Research Bulletin, Neuroinformatics, Neuropsychologia, Frontiers in Neuroscience*

Professional & Service Affiliations

2025–Present	Trainee Committee, Flux Congress
2025–Present	Community Liaison, Open Science Special Interest Group, Organization for Human Brain Mapping
09/2024	Promoted to Moderator, NeuroStars support forum (Neurostars.org)
2019–Present	Volunteer, Virtual Bedside Concerts, Mass General Brigham
2019–2021	Co-Chair, Arts & Neuroscience Cognition Task-Force, American Congress of Rehabilitation Medicine

Teaching Experience

Teaching Fellow, ABCD-ReproNim Course

2025 **ABCD-ReproNim Course**

Supported a hybrid course on responsible and reproducible ABCD data analysis, including flipped-classroom instruction, data exercises, collaborative projects, and an in-person hackathon week focused on open-source neuroimaging workflows.

Invited Lectures

2025 **Howard University, BIOL 444: Neuroscience**

Gave a lecture on using multimodal neuroimaging to understand the cognitive processes underlying reading abilities and disabilities.

INCF-ReproNim Teaching Fellowship

2024 **Reproducible Neuroimaging Workshop**

Created and led a two-day workshop on reproducible, open source, end-to-end neuroimaging workflows. Taught best practices in data curation, pre- and post-processing for functional and diffusion MRI.

Teaching Fellow, Harvard University

Falls **How Music Works: Engineering the Acoustical World**

2021-2023

Led sections and supported hands-on projects for an interdisciplinary engineering course using music and acoustics to introduce concepts in physics, mathematics, signal processing, digital audio, and design.

Teaching Assistant, University of Pennsylvania

Fall 2017 **Differential Equations & Linear Algebra**

Supported instruction in matrices, linear systems, vector spaces, linear transformations, and systems of ordinary differential equations, with emphasis on engineering applications.

Fall 2016 **Bioengineering Signals & Systems**
& 2017

Supported instruction in continuous and discrete signals, linear time-invariant systems, Fourier analysis, filtering, sampling, and biomedical applications including ECG, blood pressure, auditory coding, cochlear implants, and imaging.
