

Steven Lee Meisler

Curriculum Vitae

I am a developmental neuroinformaticist studying white matter maturation and its role in cognitive development and emerging psychopathology. As a NICHD K99/R00 postdoctoral fellow at the University of Pennsylvania, I leverage large-scale datasets and advanced analytic methods to characterize white matter developmental trajectories across infancy, childhood, and adolescence. My graduate work integrated multimodal neuroimaging (fMRI, DWI) with behavioral and cognitive assessments to investigate the neural bases of reading ability, disability, and intervention in children. Beyond my primary research, I am an active advocate for open and reproducible science. I moderate the NeuroStars.org support forum and teach researchers how to process neuroimaging data using open-source, state-of-the-art tools. I received my bachelor's and master's degrees in bioengineering from the University of Pennsylvania (2017, 2018) and PhD in Speech and Hearing Bioscience and Technology from Harvard University (2024).

Education

2019–2024 **PhD in Speech and Hearing Bioscience and Technology**, *Harvard University, Division of Medical Sciences*, Cambridge, MA
Secondary Field in Mind, Brain & Behavior
Dissertation: "White Matter Structural Correlates of Reading Abilities, Disabilities, and Intervention" - Advisor: John Gabrieli, PhD

2017–2018 **MSE in Bioengineering**, *University of Pennsylvania*, Philadelphia, PA, *3.79/4*
Thesis: "Evaluating the Effect of Intracranial EEG Data Cleaning on Univariate and Multivariate Classifier Performance" - Advisor: Michael Kahana, PhD

2013–2017 **BSE in Bioengineering**, *University of Pennsylvania*, Philadelphia, PA, *3.70/4 magna cum laude*
Minors in Mathematics, Jazz Studies, and Engineering Entrepreneurship

Research Positions

2024– **Postdoctoral Fellow**, *Lifespan Informatics & Neuroimaging Center*, University of Pennsylvania (PI: Theodore Satterthwaite, MD), NIH **K99/R00** and T32 Fellow
- Investigating white matter micro- and macrostructural trajectories in infants and toddlers, and how they are impacted by perinatal insult (e.g., low gestational age).
- Gauging the generalizability of white matter growth curves derived from research-quality datasets to data acquired clinically.
- Contributing to neuroimaging preprocessing software development (*QSIPrep*, *QSIRecon*, *XCP-D*).

Summer 2024 **Research Scientist Intern**, *Turing Medical*, St. Louis, MO
- Developed and tested neuroimaging software solutions for clinical practice.

2019–2024 **PhD Candidate**, *Gabrieli Lab*, MIT Brain and Cognitive Sciences (PI: John Gabrieli, PhD), NIH T32 Trainee and F31 Fellow
- Used advanced diffusion-weighted imaging models to study white matter microstructural correlates of reading in large pediatric cohorts ($>$ 1,000 participants).
- Studied longitudinal microstructural changes in white matter associated with response to reading intervention.
- Examined contributions of right hemispheric activity to reading improvement after intervention among dyslexic children.

Updated October 29, 2026

2018–2019 **Clinical Research Coordinator**, *Laboratory for NeuroImaging of Coma and Consciousness*, Massachusetts General Hospital (PI: Brian Edlow, MD)

- Used machine learning to test if EEG and MRI biometrics in the ICU can predict long-term recovery outcomes from traumatic brain injury.
- Was responsible for screening patients, as well as submitting and maintaining regulatory documentation.

2017–2018 **Graduate Research Assistant**, *Computational Memory Lab*, University of Pennsylvania (PI: Michael Kahana, PhD)

- Researched efficacy of various data preprocessing methods on classification of neural activity during memory tasks.
- Created a Python-based GUI that visualizes and annotates EEG signals for analysis in a multi-site DARPA-funded clinical study.

Funding

External

07/2026 – 06/2028 **Generalizable Growth Charts of Thalamocortical Development in Early Childhood**,
Funding Agency: NIH, NICHD (type: K99/R00; HD122318), Role: PI

9/2025 – 8/2026 **Hartwell Fellowship**,
Funding Agency: Hartwell Foundation

8/2024 – 8/2025 **Psychosis: A Convergent Neuroscience Perspective**,
Funding Agency: NIH, NIMH (type: T32; MH019112), Role: Trainee
(PI: Raquel E. Gur)

9/2023 – 05/2024 **Neurocognitive Mechanisms of Positive Intervention Response in Reading Disability**,
Funding Agency: NIH, NICHD (type: F31; HD111139), Role: PI

8/2019 – 8/2022 **Training in Speech and Hearing Sciences**,
Funding Agency: NIH, NIDCD (type: T32; DC000038), Role: Trainee
(PI: Gwenaelle S. Géléoc)

Honors & Awards

2/2026-2/2028 **Career Development Institute in Psychiatry Fellowship**, University of Pittsburgh and Stanford University

9/2025-8/2026 **Hartwell Fellowship**, supporting early-stage biomedical research with potential to benefit children, Hartwell Foundation

9/2025-1/2026 **ABCD-ReproNim Teaching Fellow**, ReproNim: A Center for Reproducible Neuroimaging Computation

6/2024-06/2025 **Reproducible Neuroimaging Fellow**, ReproNim-International Neuroinformatics Coordinating Facility (INCF)

5/2024 **Ragnar & Margaret Naess Award** for exceptional musical talent and commitment to performance, MIT

8/2022 **Patrick J. McGovern Student Travel Award**, MIT

Summer 2022 **Selected for Neurohackademy 2022**

3/2022 **Certificate of Distinction in Teaching**, Harvard University

3/2020 **Mind Brain Behavior Graduate Student Award**, Harvard University

3/2019 **University Fellowship** *(declined)*, The Ohio State University

2017 ***magna cum laude***, University of Pennsylvania

2015 – 2017 **Dean's List**, University of Pennsylvania

Skills

Computing Python, Bash / Terminal, R, GitHub, High-Performance Computing, LaTeX, MATLAB

Methods DWI, fMRI, EEG Time Series Analysis, BIDS-apps, Longitudinal/Non-linear Modeling

Other Skills EPIC, REDCap, IRB, Jazz Vibraphone

Professional & Service Affiliations

2025–Present Trainee Committee Officer, Flux Congress

2025–Present Community Liaison, Open Science Special Interest Group, Organization for Human Brain Mapping

09/2024 Promoted to Moderator, NeuroStars support forum (`Neurostars.org`)

2019–Present Volunteer, Virtual Bedside Concerts, Mass General Brigham

2019–2021 Co-Chair, Arts & Neuroscience Cognition Task-Force, American Congress of Rehabilitation Medicine

Teaching Experience

Teaching Fellow, ABCD-ReproNim Course

2025 **ABCD-ReproNim Course**

Supported a hybrid course on responsible and reproducible ABCD data analysis, including flipped-classroom instruction, data exercises, collaborative projects, and an in-person hackathon week focused on open-source neuroimaging workflows.

Invited Lectures

2025 **Howard University, BIOL 444: Neuroscience**

Gave a lecture on using multimodal neuroimaging to understand the cognitive processes underlying reading abilities and disabilities.

INCF-ReproNim Teaching Fellowship

2024 **Reproducible Neuroimaging Workshop**

Created and led a two-day workshop on reproducible, open source, end-to-end neuroimaging workflows. Taught best practices in data curation, pre- and post-processing for functional and diffusion MRI.

Teaching Fellow, Harvard University

Falls 2021-2023 **How Music Works: Engineering the Acoustical World**

Led sections and supported hands-on projects for an interdisciplinary engineering course using music and acoustics to introduce concepts in physics, mathematics, signal processing, digital audio, and design.

Teaching Assistant, University of Pennsylvania

Fall 2017 **Differential Equations & Linear Algebra**

Supported instruction in matrices, linear systems, vector spaces, linear transformations, and systems of ordinary differential equations, with emphasis on engineering applications.

Fall 2016 & 2017 **Bioengineering Signals & Systems**

Supported instruction in continuous and discrete signals, linear time-invariant systems, Fourier analysis, filtering, sampling, and biomedical applications including ECG, blood pressure, auditory coding, cochlear implants, and imaging.
